1. Tiered Volume Rebate for Non-Auction Transactions

Market Makers and Public Customers will receive a per contract rebate in Non-Auction Transactions according to the Tier achieved by the Market Maker or Public Customer, respectively, as provided in the tables below. Percentage thresholds will be calculated on a monthly basis by totaling the Market Maker or Public Customer's executed Auction and Non-Auction transaction volume on BOX, relative to the total national Market Maker or Customer volume in multiply-listed options classes.

The following transactions are considered exempt from the Market Maker Tiered Volume Rebate: (i) where a Public Customer is a contra party; and (ii) when the transaction is not a result of a Market Maker quote. These transactions, as well as Market Maker transactions which take liquidity, will continue to count toward the Market Maker's executed volume on BOX.

¹ Orders initiated electronically, as opposed to orders initiated and presented on the Trading Floor in open outcry. For all volume threshold calculations within this fee schedule, a Participant's electronic and manual volume will be considered.

Non-Auction Transactions where a Public Customer order interacts with another Public Customer order will be exempt from the per contract rebate listed below. These transactions will still count toward the Public Customer’s monthly volume on BOX.

		Per Contract Rebate

1. Primary Improvement Order⁶

A per contract execution fee based upon the tiered fee schedule below will be applied to Primary Improvement Order executions where the corresponding PIP or COPIP Order is from the account of a Public Customer. Percentage thresholds will be calculated on a monthly basis by totaling the Initiating Participant's Primary Improvement Order volume submitted to BOX, relative to the total national Customer volume in multiply-listed options classes.

² Transactions executed through Price Improvement Period ("PIP") and the Complex Order Price Improvement Period ("COPIP") auction mechanisms. All COPIP transactions will be charged per contract per leg.

³ A PIP Order or COPIP Order is a Customer Order (an agency order for the account of either a customer or a broker-dealer) designated for the PIP or COPIP, respectively.

⁴ An Improvement Order is a response to a PIP or COPIP auction.

⁵ Options contracts overlying the Standard and Poor's Depository Receipts Trust ("SPY").

⁶ A Primary Improvement Order is the matching contra order submitted to the PIP or COPIP on the opposite side of the PIP or COPIP order.

A per contract execution fee of \$0.05 will be applied to Primary Improvement Order executions where the corresponding PIP or COPIP Order is from the account of a Non-Public Customer.⁷ A per contract execution fee of \$0.02 will be applied to all SPY Primary Improvement Orders.⁸

¹³ A “short stock interest strategy” is defined as a transaction done to achieve a short stock interest arbitrage involving the purchase, sale, and exercise of in-the-money options of the same class. A “long stock interest strategy” is defined as a transaction done to achieve long stock involving the purchase, sale, and exercise of in-the-money options of the same class. A “merger strategy” is defined as transactions done to achieve a merger arbitrage involving the purchase, sale and exercise of options of the same class and expiration date, each executed prior to the date on which shareholders of record are required to elect their respective form of consideration, i.e., cash or stock. A “reversal strategy” is established by combining a short security position with a short put and a long call position that shares the same strike and expiration. A “conversion strategy” is established by combining a long position in the underlying security with a long put and a short call position that shares the same strike and expiration. A “jelly roll strategy” is created by entering into two separate positions simultaneously. One position involves buying a put and selling a call with the same strike price and expiration. The second position involves selling a put and buying a call, with the same strike price, but with a different expiration from the first position. A “box spread strategy” is a strategy that synthesizes long and short stock positions to create a profit. Specifically, a long call and short put at one strike is combined with a short call and long put at a different strike to create synthetic long and synthetic short stock positions, respectively.

¹⁴ The fees for each type of Strategy QOO Order manual transaction will also apply to this cap. See Section II.D (Strategy QOO Order Fee Cap and Rebate).

A \$0.22 per contract rebate will be applied to the Agency Order when both parties to the QCC transaction are a Broker Dealer or Market Maker. The rebate will be paid to the Participant that entered the order into the BOX system.

If the Participant qualifies for both rebates, only the larger rebate will be applied to the QCC transaction.

¹⁵ A QCC transaction is comprised of an originating order (Agency Order) to buy or sell at least 1,000 contracts or 10,000 mini-option contracts, coupled with a contra-side order or orders totaling an equal number of contracts.

¹⁷ A “Broker Dealer facilitating a Public Customer” applies to any Manual transaction executed using the open outcry process involving a Broker Dealer that has a Public Customer of that same Broker Dealer on the contra side of the transaction, or where the Broker Dealer and the Public Customer both clear through the same clearing firm and the Broker Dealer clears in the customer range.

All Complex Order and COPIP transactions will be charged per contract per leg.

All Complex Order transactions will count toward a Market Maker's monthly executed volume on BOX in Section I.A.1.

A. All Complex Orders

Certain fees are assessed by the datacenters and will be billed directly to the market participant. BOX will pass-through any connectivity fees to Participants and non-Participants that are assessed to BOX by these third-party external vendors on behalf of a Participant or non-Participant. Connectivity fees can include one-time set-up fees, monthly charges, and other fees charged by the third-party vendor in exchange for the services provided to the market participant.

2. BOX Connectivity Fees

The ORF is collected by OCC on behalf of BOX from either (1) a Participant that was the ultimate clearing firm for the transaction or (2) a non-Participant that was the ultimate clearing firm where a Participant was the executing clearing firm for the transaction. The Exchange uses reports from OCC to determine the identity of the executing clearing firm and ultimate clearing firm. Section VII. Billing

A. Aggregate Billing

For purposes of applying any provision of the BOX Fee Schedule where the charge assessed or credit provided by the Exchange depends upon the volume of a Participant's activity, a Participant may request that the Exchange aggregate its eligible activity with the eligible activity of either its affiliate(s) or its Appointed OFP or its Appointed Market Maker.

1. A Participant requesting aggregation of eligible affiliate activity shall be required to certify to the Exchange which affiliate it seeks to aggregate prior to receiving approval for aggregation, and shall be required to inform the Exchange immediately of any event that causes an entity to cease to be an affiliate. The Exchange shall review available information regarding the entities and reserves the right to request additional information to verify the affiliate status of an entity. The Exchange shall approve a request unless it determines that the certificate is not accurate.
2. If two or more Participants become affiliated on or prior to the sixteenth day of a month, and submit the required request for aggregation on or prior to the twenty-second day of the month, an approval of the request by the Exchange shall be deemed to be effective as of the first day of that month. If two or more Participants become affiliated after the sixteenth day of a month, or submit a request for aggregation after the twenty-second day of the month, an approval of the request by the Exchange shall be deemed to be effective as of the first day of the next calendar month.
