Informational Circular

IC-2021-14

TO: BOX Options Participants
FROM: BOX Market Operations Center
SUBJECT: HSVF Retransmission Functionality
DATE: March 12, 2021

BOX Options Market ("BOX") recently distributed [IC-2021-05](#) which detailed the upcoming modifications that will be made to the BOX High Speed Vendor Feed ("HSVF").

The functionality change for retransmission requests has been rescheduled to **Monday, March 22, 2021**.

In addition, BOX would like to clarify that if the HSVF Sequence rolls over past the 1 billion message mark per day, a retransmission request will be interpreted as follows:

- The start sequence will be used as provided. The effective range will be sequence 1 to 999,999,999.
- The end sequence will be incremented by 1 billion. The effective range will be sequence 1,000,000,001 to 1,999,999,999

Finally, if the HSVF Sequence is past the billion message mark per day, a retransmission request will return the HSVF messages from the start sequence (1 to 999,999,999), roll-over to 0, and continue to the end sequence (1 to 999,999,999).
