Regulatory Circular

RC-2022-09

---

**TO: BOX Options Participants**  
**FROM: BOX Exchange LLC**  
**SUBJECT: Equalized Cabling Infrastructure - Limitations on Connections**  
**DATE: March 30, 2022**

---

BOX Exchange LLC (the "Exchange") is distributing this Regulatory Circular to remind Participants that under the new equalized cabling infrastructure, there is now a maximum number of production connections allowed per Participant. Further information can be found in the [Network Connectivity Guide for BOX Options](#). As detailed in the Network Connectivity Guide, there are no limitations on connections to the test environments and the BOX disaster recovery systems.

It will be considered a violation of Exchange Rule 3000 (Just and Equitable Principles of Trade) for a Participant to leverage affiliated entities or the existence of multiple BOX IDs to bypass the limitations on production connections.
